All AOL wants to do is to eliminate competition.

If Microsoft wants to give their products away, I say great for the consumer.  
I love it.

I am and have been a customer of AOL now for about 5 years and I am considering dumping them because I believe they have a monopoly.

I believe they presently control the Internet and don't want any competition.

Every Microsoft product I purchased, I believe has been a great bargain.

AOL are big cry babies.
